

## European Solar Energy Storage

# Customized containerized battery storage quotation for France project

## Overview

---

What is the largest battery-based energy storage system in France?

Total launches a battery-based energy storage project in Mardyck, at the Flandres Center, in Dunkirk's port district. With a storage capacity of 25 megawatt hours (MWh) and output of 25 MW of power, the new lithium-ion energy storage system will be the largest in France.

Where is the first battery energy storage solution being built?

The first Q ENERGY battery energy storage solution is currently being built as a stand-alone solution on the site of the Emile Huchet power plant in north-eastern France. The project is part of a comprehensive green transformation of the previously fossil-fuelled power plant by its owner GazelEnergie.

What is a battery energy storage system?

Our battery energy storage systems (BESS) provide the optimal answer to intermittent energy production. By absorbing excess energy generated during periods of high production, BESS enable a smoother and more reliable integration of renewable energy into the grid, steadily reducing dependence on fossil fuels.

## Customized containerized battery storage quotation for France project
