

## European Solar Energy Storage

# Customized portable solar power box quotation for Greenland project

## Overview

---

Use the company profile section to establish credibility and trust around your business. If your business has been operational for a.

Your proposal should start with the details of the proposed solar project. Specify your understanding of the requirements given to you by the customer.

This is one of the most important parts of a proposal, capturing all technical details of the proposed solar PV installation. It should cover details like - 1. Customer requirements and site details captured in site survey 2. Scope of work - all estimated activities 3. Project schedule 4. Bill of materials (BOM) 5. Preliminary solar PV design(if ap.

If you have made any assumptions at the time of making this proposal it is better to clearly state them as such. Your customer should also understand those assumptions and sign off on them. This will help you avoid any misunderstanding and disputes later on.

The detailed pricing for all materials, installation work and any other services should be listed in this section. Use this space to provide a basic return on investment (ROI) analysis for the customer. This is especially important to convince home owners who may not do an ROI analysis on their own.
