

European Solar Energy Storage

Customized portable solar solution quotation in Romania 2026

Overview

Does Romania have a good solar resource potential?

Romania has very good solar resource potential as the geographical location is favourable for utilising solar energy. Romania is located in an area with a solar potential of 210 sunny days per year and with an annual solar energy flux between 1,000 kWh/m²/year and 1,300 kWh/m²/year.

How much solar energy is possible in Romania?

Romania is located in an area with a solar potential of 210 sunny days per year and with an annual solar energy flux between 1,000 kWh/m²/year and 1,300 kWh/m²/year. From this total amount, around 600 to 800 kWh/m²/year is technically feasible. Chart 1: Solar Resource Map of Romania; Sources: World Bank Group, ESMAP, SolarGis.

What is the Romanian environmental association 2026?

With the support of the Romanian Environmental Association, the 2026 edition marks the launch of a strategic collaboration between Romania and the Republic of Moldova. This initiative offers exhibitors extended access to a rapidly developing regional market, fostering cross-border partnerships in energy, waste, and water management sectors.

Why should you attend the 2026 Green Energy Expo – romenvirotec?

Join us as an exhibitor for the 2026 edition and become part of the most powerful regional HUB for green solutions! The second edition of Green Energy Expo – Romenvirotec brought together over 8,800 professional visitors interested in solutions for energy transition, environmental protection, and the development of sustainable cities.
