Czechia inverter companies in

Overview

Who makes solar panels & inverters?

The company SOLSOL s.r.o. has operated on the Czech market since 2012. It deals with the wholesale of solar panels and inverters. Since 2013, it has been an exclusive partner of the Taiwanese company AUO (formerly BenQ), which produces high-efficiency mono-photovoltaic modules at a plant in Brno with the capacity of 200 MWp/year.

How is the solar industry growing in Czech Republic?

In Czech Republic, in particular, the solar industry is experiencing a massive growth period. There are more households and businesses that have installed solar roof panels. Czech Republic held a 19% share in renewable energy for electricity generation. They are expected to increase the share to 22% by 2030.

Where are solar inverters located?

Microinverters are located on the roof near the solar panels, due to which these inverters are more efficient than string inverters when it comes to converting energy. Solar systems with microinverters can still generate electricity, even if one or two panels do not perform properly.

What is the future of solar energy in Czech Republic?

In the 2021 Solar Conference, Industry and Trade Minister Karel Havlicek reveals that the future is bright for the solar energy market in Czech Republic. The country plans to move away from coal as its main power source and they are looking at renewable sources as a viable option for replacement.

What is a solar inverter?

The solar inverter or inverter converts direct current into alternating current, thanks to which the energy from the photovoltaic system can only be used. We offer classic or hybrid (mains and battery) inverters with different

performance and characteristics.

Why should you invest in photovoltaic technology in the Czech Republic?

Over the years, we have become a stable leader in the sale of photovoltaic technologies in the B2B segment in the Czech Republic thanks to excellent know-how and a dynamic approach to the latest technologies. We are gradually expanding and becoming a significant player in foreign markets as well.

Top Inverter Accessories Suppliers in Czech Republic

What Is a Solar Inverter? A solar inverter, also known as a PV inverter, is a type of electrical converter that converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network. Basically, a solar inverter is a critical balance

Wholesaler and solutions provider in Photovoltaics

The new 4th generation of the X1 boost inverter offers a wide range of new features in terms of the product's dimensions, technical specifications and compatibility with other Solax products.
