Solar energy plays an essential role in our company's clean-energy strategy and is crucial to our vision of becoming the most sustainable energy company in America. Since 2013, we've helped bring 2,200 megawatts (MW) of solar into operation in 10 states. That is enough energy to power about 550,000.

Dominion Energy Solutions offers a variety of solar financing options, including loans with no initial down payment, to assist in the acquisition of solar panels. Through this program, homeowners are allowed to maintain ownership of their systems. The program offers low interest rates and 10 and 25.

Our solar fleet powers 450,000 homes with zero-carbon electricity. Rooftop solar is a clean, renewable energy option if customers want to consume their own clean energy at their home. Harnessing the sun's energy to power your home. There are many things to consider when deciding to have solar.

Dominion Energy has officially filed its proposal to overhaul net metering in Virginia, and the changes they're pushing could deal a serious blow to solar installations in Virginia. If you're a homeowner or business considering solar, this proposal directly affects your energy savings, your rights.

This voluntary program enables residential and non-residential customers with the opportunity to match 100 percent of their energy needs with solar, hydropower and biomass renewable energy. The Dominion Energy 100% Renewable EnergySM program provides customers with the ability to support the.

Dominion Energy will install a meter measuring two-way flow of electricity, so when your system is producing excess energy, that extra electricity will flow back to the grid and you may be credited or paid for the excess that your system produced. When your system is not producing enough energy. Does Dominion Energy have solar?
