Following approval from the Indiana Utility Regulatory Commission, Duke will purchase the power produced by Ranger Power's Speedway solar project south of. Does Duke Energy have solar power in Indiana?

PLAINFIELD, Ind., June 22, 2023 /PRNewswire/ -- Duke Energy is expanding its Indiana solar energy resources. The company has signed an agreement with renewable energy developer Ranger Power for up to 199 megawatts of solar power to serve the equivalent of roughly 35,000 homes.

Will Duke Energy add solar power to Indiana's Integrated Resource Plan?

Under the company's most recent Indiana Integrated Resource Plan, Duke Energy is proposing to add 2,218 megawatts of solar power, 450 megawatts of solar with energy storage and 6,200 megawatts of wind energy.

Does Duke Energy have a solar power purchase agreement with Ranger power?

Duke Energy Corp. DUK recently signed a 20-year power purchase agreement (PPA) with Ranger Power to buy up to 199 megawatts (MW) of solar energy from the latter's Speedway Solar plant. This initiative, which can serve almost 35,000 households in Indiana, will increase DUK's solar energy capacity in Hoosier State.

What will Duke Energy's new solar power plant do?

"The emission-free solar power that this new facility generates will help us continue to diversify our generation resources and make meaningful progress toward a cleaner energy future," said Stan Pinegar, president of Duke Energy Indiana. Construction on the 1,700-acre facility located south of Gwynneville, Ind., began in March 2023.

How much does Duke Energy cost in Indiana?

In Indiana, Duke Energy has three levels of generating facilities for net metering contracts: Most residential customers in Indiana will install Level 1 systems. Duke Energy Indiana's current rate for Residential and Farm Electric Service is approximately 11 cents/kWh, and also requires a connection charge of \$9.40/month.

How much electricity does Duke Energy generate from solar?

Today, nearly 5% of U.S. electricity comes from solar generation, almost 11 times as much as a decade ago. In 2022, Duke Energy and its subsidiaries had 180 utility-scale solar projects in 16 states and can generate more than 10,000 megawatts of electricity from wind and solar. Think you know solar now?
