

European Solar Energy Storage

Eas battery Portugal

Overview

Who is EAS batteries?

EAS Batteries GmbH: EAS has played an essential role in the transition to a world of high power electric equipment with its lithium ion cells and modules.

Where are EAS batteries produced?

EAS batteries are designed and manufactured in Germany. EAS produces high performance cells using patented production processes. The Lithium iron phosphate (LFP) chemistry, used in the EAS batteries production, provides safe and outstanding charge and discharge performance.

Are EAS cells safe?

EAS cells have a proven record of exceptional safety and have performed well in many applications. For instance, Planet Solar, one of EAS's benchmark solutions, is a fully electric solar catamaran that has circumnavigated the Earth several times without any issues.

Where can EAS solutions be used?

Tailor-made EAS solutions are already adopted for aerospace and defense, submarine and marine, automotive applications in Europe, Asia and North America, and prominent business partners such as NASA are already powered by EAS cells. Our experts are happy to support you – simply contact us if you would like additional information or detailed advice.

EAS Batteries erhielt im August 2019 die UN38.3-Zertifizierung für seine neu entwickelte High Power 40 Ah LFP-Batteriezele. Do., 29.08.2019 - 12:00. Battery-Management-Systeme der Zukunft - Chancen und Herausforderungen. Projektreferenz: Schnellladefähige Rundzelle mit Nioboxid-Anoden.

AES Commissions Alamitos Energy Storage Facility in Long

...

LONG BEACH, Calif., Jan. 27, 2021 /PRNewswire/ -- The AES Corporation (NYSE: AES) has commenced operations of the Alamitos battery energy storage system (BESS), one of the world's largest battery

EAS Batteries GmbH

Since June 2017, EAS is fully owned by Monbat Economic Group, a leading manufacturer and distributor of lead-acid batteries with vertical integration and production and recycling facilities

...

The AES Alamitos Battery Energy Storage System made

history.

It's the world's first grid-scale battery energy storage system to receive a long-term power purchase agreement (PPA). It's the first standalone battery energy storage system specifically procured to replace a natural gas peaker plant in the U.S. But these firsts only matter if they have broader implications for the clean energy transition.

[AES Dashboard Troubleshooting](#)

NOTE: The battery will reject a firmware update if there is current flowing in or out of the battery. Ensure that there is no charge or discharge current or disconnect the battery cables to be certain. Troubleshooting: Reinstall the boot loader drivers: Help > Service Center > Setup > Update Drivers. Double-check that the battery is in Boot Mode.
