

European Solar Energy Storage

Egypt paragon solar

Overview

Why is Egypt launching a 500 million solar plant in Aswan?

Egypt inaugurated a \$500 million solar plant in the southern city of Aswan on Saturday as part of its push to boost renewable energy production after last summer's severe power outages. The Abydos Solar PV Plant, which was developed by Dubai-based energy company AMEA Power, has a capacity of 500 megawatts and was completed in just 18 months.

How much does JA Solar cost in Egypt?

Egyptian Prime Minister Mostafa Madbouly attended the signing ceremony. JA Solar will oversee the construction of a 2 GW solar cell factory and a 2 GW PV module factory, partnering with local Egyptian entities. The solar cell factory will cost \$138 million, while the module factory will require \$75 million.

Will a solar power plant help Egypt deal with power shortages?

The solar plant "will accelerate Egypt's green power strategy and help it deal with power shortages that took place over the past year", said the chairman of AMEA Power, Hussain Al Nowais, adding that the first electricity from the plant was delivered to the national grid last week.

Where can solar power be developed in Egypt?

Utility-scale PV development has, thus far, clustered around Aswan in the south of the country, where solar resources are strongest and there is plenty of land for development. The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world's biggest PV sites.

Will JA Solar build a 2 GW solar plant in Egypt?

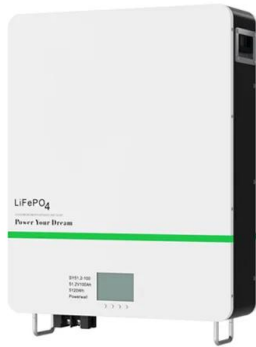

Chinese manufacturer JA Solar has agreed to build a 2 GW solar cell and module factory in Egypt with support from UAE-based Global South Utilities. The Egyptian government has signed a memorandum of understanding (MoU)

with UAE-based Global South Utilities and China's JA Solar to set up two solar manufacturing facilities at unspecified locations.

What does China's new solar project mean for Egypt?

A new agreement signed between the Chinese group and Egyptian government officials is part of the country's Green Corridor Initiative that aims to increase the use of renewable energy. The solar project is expected to save more than \$1 billion in annual natural gas costs.
