

## European Solar Energy Storage

# Electrochemical energy storage system supervision rules

## Overview

---

As for supervision and control system for electrochemical energy storage station (referred to as "supervision and control system"), this document specifies the requirements for data acquisition, data processing, control and regulation, alarm, event sequence recording and accident recollection, communication, data storage, human-computer interfaces, system time synchronization and system load rate, describes the corresponding test methods, and stipulates the normal working conditions and system architecture, as well as marking, packaging, transport and storage of the supervision and control system.

## Electrochemical energy storage system supervision rules

### GB/T 42726-2023 English Version, GB/T 42726-2023 ...

As for supervision and control system for

electrochemical energy storage station (referred to as "supervision and control system"), this document specifies the requirements for data acquisition, data processing, control and regulation, alarm, event sequence recording and accident recollection, communication, data storage, human-computer

????????????????????

Through empirical research on four typical electrochemical energy storage projects, this paper analyzes the technical supervision elements of the entire construction cycle of energy storage projects, focusing on key links such as engineering quality control, equipment commissioning specifications, and fire safety systems, revealing prominent
