

European Solar Energy Storage

Electrolytic separator energy upgrade Timor-Leste

Energy storage(KWH)

102.4kWh

Nominal voltage(Vdc)

512V

Outdoor All-in-one ESS cabinet

Overview

Does the electrolytic separator respond to energy upgrades?

Sign up for free to join this conversation on GitHub . Already have an account?

Sign in to comment The Electrolytic Separator, when separating Water into Hydrogen and Oxygen gas, does not respond to Energy Upgrades. Other machines do. The Electrolytic Separator is being powered by Advanced Univ.

How much power does an electrolytic separator need?

Since Mekanism 7.1 (Minecraft 1.7.10) the Electrolytic Separator requires 400 joules of power per tick, or 160 FE per tick. Without upgrades, it performs 1 operation per tick. Notably, each speed upgrade doubles the operation speed of this machine, for 256 operations per tick with the maximum of 8 speed upgrades.

Should a gas separator be upgraded?

If not, and you have just speed, that'll do it. Also, depending on which machine they're pumping into, use the "gas" upgrade in that machine. It will upgrade the efficiency. Should use less of said gas that way, so the separator will not have to work as hard. Something's wrong there.

Should I upgrade an electrolytic separator or a speed+energy upgrade card?

And since an Electrolytic Separator is not that much more expensive than a speed+energy upgrade card, it really doesn't make sense to consume 100x power (operate them at 10% efficiency). Difference in material between upgrading 1 separator vs building 9 more (10x speed either way).

What is an electrolytic separator used for?

Typically the first application of the Electrolytic Separator is in the electrolyzing of water into Hydrogen and Oxygen. Both have various uses within other recipes. Higher-tier ore processing requires the creation of

Chlorine, which is a product of electrolyzing the sodium chlorides in a Brine solution.

Why is my electrolytic separator not giving more gas?

There is an issue that happens with multiple electrolytic separators where they start eating all of the power and not giving more gas. Try breaking them all and putting one at a time back down and turning it on, that has usually fixed it for me. I actually had this problem last night.

Electrolytic separator energy upgrade Timor-Leste

Electrolytic Separator Energy Usage · Issue #7068

After inserting Energy Upgrade's in the Electrolytic Separator the Energy Usage doesn't decrease. Steps to reproduce: 1 sert Energy Upgrade's (any amount) into Electrolytic Separator. 2. Energy Usage doesn't decrease. Version (make sure you are on the latest version before reporting): **Forge:1.16.5-forge-36.0.54
**Mekanism:1.16.5-10.0.21.488

[E2E] Mekanism as-burning generator problem : r/feedthebeast ...

2 Electrolytic separators (Upgrades: 8 energy, 3 speed) 2 PRCs (Upgrades: 8 energy, 8 speed) 2 Crushers (Upgrades: 8 energy, 8 speed) 3 Gas-burning generators I have seen this setup a bunch of times on this subreddit and on some E2E playthroughs on but I can't seem to get it working properly. Here are some things I've already tried/checked:

Electrolytic Separator speed upgrade bug · Issue #3498

Power is provided using a Creative Energy Cell from Thermal Expansion. I do not believe there is a power delivery issue. I'm unsure if this issue carries over to other machines (Untested). JujuLynx changed the title Electrolytic Separator Speed Upgrade Electrolytic Separator speed upgrade bug Jul 19, 2016. Copy link Member. aidancbrady

Electrolytic Core

The Electrolytic Core is a Crafting Component used in the crafting of the Electrolytic Separator and the Gas-Burning Generator. Crafting. Ingredients Crafting recipe Gold Dust + Infused Alloy + Osmium Dust + Iron Dust Energy Upgrade; Gas Upgrade; Filter Upgrade; Anchor Upgrade; Factory Installers; Gadgets: Atomic Disassembler; Cardboard Box

Electrolytic separator consuming ridiculous amounts of power

Separators use high amounts of energy, especially when upgraded, to avoid an infinite energy exploit by feeding the Hydrogen from water to a Gas-Burning Generator. If you have no better ...

Need help with Mekanism. Can anyone explain why I'm not

It costs the same amount of energy to separate water into oxygen/hydrogen as you get by burning the hydrogen; and energy upgrades don't make the separator more efficient for balancing. All your power is either coming from the solar panel or stored in the cables and machine buffers

 **LFP 12V 100Ah**

Energy Upgrades do not work in Electrolytic Separator #7487

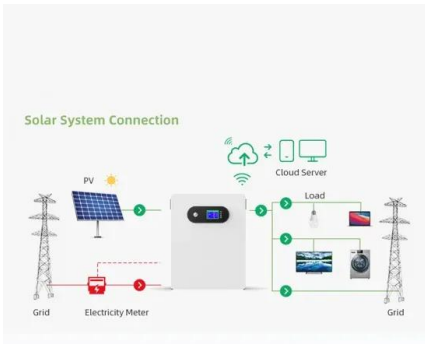

Issue description. Perhaps I am doing something wrong, but the addition of Energy Upgrades into the electrolytic separator appears to have no impact on overall energy usage, while speed

upgrades have a major effect.

Electrolytic Separator

Since Mekanism 7.1 (Minecraft 1.7.10) the Electrolytic Separator requires 400 joules of power per tick, or 160 FE per tick. Without upgrades, it performs 1 operation per tick. Notably, each ...

Electrolytic separator ignores Energy improvement (The electrolytic ...

Issue description I installed the Energy improvement in the separator and noticed the fact that the consumption did not decrease, but the amount of energy increased. Energy upgrades do not decrease the consumption of electrolytic separators intentionally. 16, 2024. see general.toml section
 general.energy_conversion: #How much energy is

electrolytic separator not using energy upgrades #7426

Issue description My electrolytic separators, with 8 speed upgrades, use 40.96 kFE/t no matter how many energy upgrades are installed. Steps

to reproduce No response Minecraft version
 1.16.5 (Latest) Forge version 36.2.30 Mekanism
 versio

Mekanism Electrolytic Separator ratio to Gas Burning

...

When the Electrolytic Separator was first given the upgrade slot, it followed both of those rules and allowed the machine to break the Laws of Thermodynamics (oops). The fairly quick but haphazard response was to make the Electrolytic Separator not receive the efficiency boost. That works, but also generates a lot of false bug reports as it is

Energy Upgrade on Elctrolytic Separator does not working #3148 ...

Modpack Version 0.5.11 Describe your issue I can use Energy Upgrades on any Mekanism Machine except the Electrolytic Separator. Crash Report No response Latest Log No response Have you modified the modpack? No User Modifications No respo

electrolytic separator, gas generator, energy storage. #5790

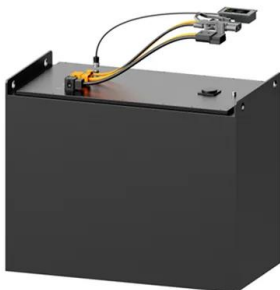

The electrolytic separator has a weird power

usage using upgrades, for example, a stock separator uses 400j/t and produces the same amount in hydrogen that the gas generator is burning. If all 8 energy upgrades are installed, the energy usage is reduced to 40j/t while the gas production stays the same.

Energy Upgrade

The energy upgrade upgrade allows you to increase the power storage capacity of a Mekanism machine which has an upgrade slot, Electrolytic Separator; Factory; Precision Sawmill; Pressurized Reaction Chamber; Chemical ...

Mekanism 10.2.4 on MC 1.18. Energy upgrades not ...

Energy upgrades not working on electrolytic Separator. Why? comments sorted by Best Top New Controversial Q& A Add a Comment Glitch-v0 o Additional comment actions. Intentional I believe.

How to power electrolytic separator? : r/feedthebeast

This also happens to be why the Electrolytic Separator is the only machine to not get the efficiency boost from using Energy Upgrades. If you need Hydrogen, then you actually do need to supply that much power (form any source). Ethylene (which is made from Hydrogen) burned in the Gas-Burning Generator is probably

Mekanism's strongest non

"Electrolytic Separator" does not respond the "Energy Upgrades"

"Electrolytic Separator" does accept "Energy Upgrades" but if you put some in the power consumption don't sink. Steps to reproduce: Tague "Energy Upgrades" in inventory and open "Upgrade"-GUI at "Electrolytic Separator" Put "Energy Upgrades" in Upgrade-Slot and let them load; Control your power consumption of the machine.

Electrolytic Separator power consumption : r/allthemods

You just need to use speed and energy upgrades on both the separator and whatever you're pumping into. Then use gas upgrades on the machine you're pumping into. That fixed it for me.

Mekanism energy question : r/feedthebeast

Try getting a bunch of energy upgrades into your electrolytic separator to reduce its energy usage/tick. Make sure you're dumping excess oxygen or using it so it doesn't stop hydrogen ...

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg 197mm / 7.7in

Product voltage: 3.2V

internal resistance: within 0.5

Mekanism: Electrolytic Separator not responding to energy upgrades

The Electrolytic Separator is being powered by Advanced Universal Cable, if that matters. No upgrades: Energy usage: With upgrades: Energy usage: It appears that, when an upgrade has finished applying, it looks as though it's attempting to adjust the energy usage (quick flickering between numbers) but it goes right back to 400.0 J/t.

Electrolytic Separator not responding to energy ...

The Electrolytic Separator, when separating Water into Hydrogen and Oxygen gas, does not respond to Energy Upgrades. Other machines do. The Electrolytic Separator is being powered by Advanced ...

Optimal power setups for the Electrolytic Separator.

Optimal power setups for the Electrolytic Separator. So in order to get more ore with Mekanism you need oxygen and you need an Electrolytic Separator for that. I used all 8 energy

GRADE A BATTERY

LiFePO4 battery will not burn when overcharged, over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

upgrades ...

Enhancements to the electrolytic separator · Issue #5815

*energy upgrades will work differently on the other hand, each upgrade will slightly increase the efficiency of the machine to near 100% and the energy capacity increase would remain the same (energy used by separator: energy recovered from gas generator) stock: 20% efficient 1 energy upgrade: 30% efficient 2 energy upgrades: 40% efficient

114KWh ESS

Electrolytic separator not getting enough power : r/Mekanism

I've got the electrolytic separator set up for 3x ore mining (connected to an auto miner via entangleporter). All of a sudden my ore processing started chugging, and tracked it down to this. Every other machine has full energy, but the electrolytic separator and the lack of oxygen is obviously slowing ore down to a crawl.

Energy upgrades have no effect in electrolytic separator

Issue description Energy upgrades does not

reduce energy consumption in Electrolytic Separator This is in Valhelsia 5.1.0-pre1 modpack. Steps to reproduce No response Minecraft version 1.19.2 (Latest) Forge version 43.2.10 Mekanism version 10.3.8 (Latest) Other

Improve Electrolytic Separator energy consumption with energy ...

And since an Electrolytic Separator is not that much more expensive than a speed+energy upgrade card, it really doesn't make sense to consume 100x power (operate ...

Energy Upgrades do not reduce power consumption of the Electrolytic ...

Install any number of Energy Upgrades in an Electrolytic Separator; Run the machine and observe power drain; Version (make sure you are on the latest version before reporting): Forge: 34.1.42 (1.16.3) Mekanism: 1.16.4-10.0.17.444. The text was updated successfully, but these errors were encountered:

Energy upgrades not working on electrolytic Separator. Why? comments sorted by Best Top New Controversial Q& A Add a Comment Glitch-

v0 o Additional comment actions. Intentional I believe.

[1.12] Electrolytic Separator + Energy Upgrades = Hydrogen Power

Stick a full set of Energy Upgrades in the Electrolytic Separator. Supply Water; Burn Hydrogen in a Gas-Burning Generator for 10x the power you put in. A full set of Speed Upgrades will net you nearly 18k J/t. Version (make sure you are on the latest version before reporting):

Mekanism energy question : r/feedthebeast

Try getting a bunch of energy upgrades into your electrolytic separator to reduce its energy usage/tick. Make sure you're dumping excess oxygen or using it so it doesn't stop hydrogen production. Potentially add both upgrades to your separator, keeping them 1:1 will directly increase efficiency however it will increase total power and water usage.

Energy Upgrade

The energy upgrade upgrade allows you to increase the power storage capacity of a Mekanism machine which has an upgrade slot, Electrolytic Separator; Factory; Precision Sawmill; Pressurized Reaction Chamber; Chemical

Injection Chamber; Electrolytic Core;
Teleportation Core; Thermal Evaporation Plant:

Electrolytic Separator consumes more power than it should when ...

During the investigation I discovered a discrepancy between the documentation and the observed behavior concerning speed upgrades. The wiki ...
