

European Solar Energy Storage

Energy storage and charging station news

Overview

Can energy storage solve the US power crisis?

How energy storage could solve the growing US power crisis The opportunity is clear: with the right policy reforms, revenue mechanisms, and investment frameworks, energy storage can deliver near-term reliability, long-term resilience, and economic returns.

Are battery energy storage systems vulnerable to tariffs?

Battery energy storage systems are especially vulnerable to tariffs, according to Wood Mackenzie and Anza Renewables. Data from the two firms showed a sharp increase in BESS costs last quarter.

Which energy companies are charging forward?

Invinity Energy Systems, Costain, Storengy, Root-Power, Statera Energy and Gresham House feature in this week's Charging Forward. Keuper Gas Storage Project in Cheshire could store up 400 million cubic metres of hydrogen in salt caverns.

Potentia Energy, a joint venture co-owned by Enel Green Power and INPEX, has secured the first environmental approval for a grid-scale battery energy storage system (BESS) under South Australia's new Hydrogen and Renewable Energy (HRE) Act.

Energy Storage

As New York races to meet its 2030 goal of six gigawatts of battery storage capacity, opposition to siting lithium-ion facilities in residential and commercial districts is intensifying.

Energy Storage News , Utility Dive

5 ???· The proliferation of energy storage in everything from utility-scale batteries to electric vehicles is a driving force in the transition to a cleaner, more distributed power system.

Energy Storage News , Today's latest by Renewables Now

3 ???· Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy integration and grid transition to clean power.
