Energy storage charging pile portable charger

Overview

What is a charging pile?

A charging pile is a type of outdoor charging station with waterproof, dustproof, and corrosion proof functions and an environmental protection design, featuring a protection grade of IP 54.

How many watts can a charging pile charge?

The maximum charging power of the AC charging pile is 7KW, the charging power of the DC charging pile is generally 60KW to 80KW, and the input current of a single gun can reach 150A--200A, which is a huge test for the power supply line. In some old community, even one can't be installed there.

How much does a charging pile cost?

The price of charging piles varies greatly, ranging from hundreds to thousands of RMB, causing the price difference. The most important thing is the difference in power. The price of 11KW is about 3000 or more, the price of 7KW is 1500-2500, and 3.5 The portable price of KW is under 1500.

What EV charging stations does AGreatE offer?

AGreatE offers three all-in-one Solar Energy Plus Battery Storage EV Charging Stations that are cost-effective, easy to install, and easy to operate. Each charging station is designed for the future of electric vehicles. PV BESS EV Charging systems (PBC) are pre-engineered & packaged for immediate installation.

Why should you use Bess with solar PV & EV charging?

Utilizing BESS with Solar PV and EV Charging allows clean energy to flow directly to the EV from the solar carport system, stored in the battery (BESS) or sold back to the grid. The BESS system can be configured to buy and sell electricity at different energy pricings rates thus providing a higher rate of return on the PBC systems.
