

European Solar Energy Storage

Energy storage enterprise summer

Overview

What is the Energy Storage Summit?

Our Summit aims to highlight the fundamental role that energy storage will play in this journey, and will strive to recognise, explore and analyse key challenges that may present themselves on the trajectory ahead. As of this year, the UK has reached over 120 MWh of approved grid-scale battery storage, with around 14 GW in the pipeline.

Why should you attend the energy storage Conference?

This influential gathering will feature high-level industry reports and high-end dialogues, creating a major platform for academic exchange and collaboration within the energy storage sector. The event will also place a stronger emphasis on international outreach and promotion.

How can America improve energy storage?

: Increasing America's global leadership in energy storage through a DOE-wide effort led by OE and EERE to develop, commercialize, and use next-generation technologies. : Reducing grid-scale storage costs by 90% within the decade for systems that deliver 10+ hours through a variety efforts coordinated by the ESGC.

Are battery energy storage systems affecting Long Islanders?

US Environmental Protection Agency (EPA) Administrator Lee Zeldin recently held a press conference in Hauppauge, New York, to address the concerns of battery energy storage system (BESS) installations with Long Islanders.
