

## European Solar Energy Storage

# Energy storage explosion means stock price

## Overview

---

What are energy storage stocks?

Energy storage stocks are companies that produce or develop energy storage technologies, such as batteries, capacitors, and flywheels. These technologies can store energy from renewable sources like solar and wind power, or from traditional sources like coal and natural gas.

What are some examples of energy storage stocks?

Firms that design and manufacture energy storage technologies are classified as energy storage stocks. Battery storage, capacitors, and flywheels are all examples of these. This vast industry is also made up of electric vehicles, power generation facilities, and businesses. Why is energy storage necessary?

.

Are energy storage stocks a good investment?

Currently, energy storage stocks are a relatively safe investment to make for the future, and if trends hold, they have solid potential for growth. However, if this doesn't appear to be a good fit for your investment portfolio, then it's best to look at other options.

What is energy storage?

Energy storage involves converting energy from forms that are difficult to store to more conveniently or economically storable forms. Some technologies provide short-term energy storage, while others can endure for much longer. Bulk energy storage is currently dominated by hydroelectric dams, both conventional as well as pumped.

Is Bloom Energy a good energy storage stock?

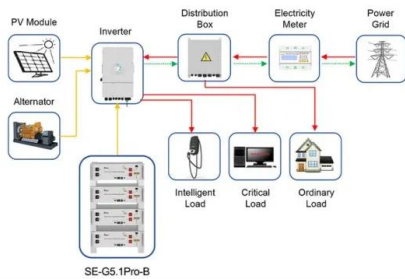

Bloom Energy is one of the smaller picks on this list, but it may be the most dynamic energy storage stock out there. It specializes in advanced fuel cell

energy platforms, which use a proprietary solid oxide technology to convert natural gas, biogas or hydrogen into electricity with low or even zero carbon emissions.

Is the energy storage industry booming?

The energy storage industry is booming. According to the International Energy Agency (IEA), battery storage capacity additions in 2020 will increase by 50% year on year, reaching a record 5 GW. By 2020, total investment in battery storage will have increased by nearly 40% to \$5.5 billion.
