

European Solar Energy Storage

Energy storage policy news

Overview

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

Can energy storage solve the US power crisis?

How energy storage could solve the growing US power crisis The opportunity is clear: with the right policy reforms, revenue mechanisms, and investment frameworks, energy storage can deliver near-term reliability, long-term resilience, and economic returns.

Are battery energy storage systems exempt from charges?

Battery energy storage systems (BESS) are currently exempt from the charges and Voltwise's head of German operations, Thorsten Klöpper, is suggesting a three-stage system which takes account of battery-related grid benefits.

Does BNEF still expect a strong demand for batteries?

Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop. Since the policy announcement, some provinces across China have continued to announce mandates stipulating that new solar and wind projects must be paired with batteries.

Energy Storage News , Today's Latest Stories , Reuters

Australia's top electricity and gas retailer Origin Energy said its green transition was proving slower and more costly than expected, while flagging its coal plant could run beyond 2027.

Global Energy Storage Growth Upheld by New Markets

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers ...

Energy Storage Investment Downturn Signals Market ...

This relative policy stability positions energy storage for recovery in the second half of 2025. The market's "wait-and-see" approach during policy uncertainty created pent-up demand for investment opportunities.

Potentia Energy, a joint venture co-owned by Enel Green Power and INPEX, has secured the first environmental approval for a grid-scale

battery energy storage system (BESS) under South Australia's new Hydrogen and Renewable Energy (HRE) Act.

Energy Storage News , Today's latest by Renewables Now

3 ???· Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy integration and grid transition to clean power.

Energy Storage News , Utility Dive

5 ???· The proliferation of energy storage in everything from utility-scale batteries to electric vehicles is a driving force in the transition to a cleaner, more distributed power system.

China scraps energy storage mandate for renewable ...

Since introduced in 2022, policy mandates requiring solar and wind energy projects to include energy storage systems have been crucial in the acceleration of storage deployment in China.

Latest Energy Storage News, Latest News On Energy Storage

Latest Energy Storage News highlights advancements in storage technologies, policy developments, and large-scale projects that are enhancing the efficiency and reliability of energy systems worldwide.

Global Energy Storage Growth Upheld by New Markets

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects.

Latest Energy Storage Policy News: What You Need to Know in ...

Buckle up, folks - 2025 is shaping up to be the most transformative year for energy storage policies since sliced bread or at least since lithium-ion batteries went mainstream.
