Energy storage policy poland latest news

LFP 48V 100Ah

Overview

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System. Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

Will Poland support new electricity storage facilities in 2024?

In an announcement released on October 3, 2024, the executive arm of the European Union said that the Polish scheme will support the installation of at least 5.4 GWh of new electricity storage facilities. The policy will support only newly installed storage facilities with a capacity of at least 4 MWh.

Which storage facilities will be supported by Poland's energy policy?

The policy will support only newly installed storage facilities with a capacity of at least 4 MWh. Eligible projects will be connected to Poland's electricity distribution or transmission networks at all voltage levels.

What is Poland's energy storage subsidy program?

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. The new regulation was published in the Journal of Laws of the Republic of Poland on March 7.

Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit

CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a €1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

Will Poland have a power storage system?

PGE Group has obtained the first license promise in Poland for electricity storage. Yes, Poland will have a power storage system. The storage system will be set up at the 716-MW Zarnowiec pumped-storage power plant with 3,600 MWh of storage capacity.

Energy storage policy poland latest news

Poland Secures \$3.7B for Energy Shift and Storage Facilities

The Polish government has recently announced a significant policy initiative aimed at advancing the country's net-zero carbon emissions goals, with a particular focus on energy storage solutions.
