Product Engineer at Pure Storage , Renewable Energy Jobs

Job Description A senior Product Engineer responsible for managing product quality throughout the manufacturing process, supporting new product development, driving design for manufacturing excellence, and leading operations engineering efforts in a high-tech hardware environment.

Product Engineer Energy Storage

Develop understanding of the broader energy system, the energy transition, and the role of emerging storage technologies in Shell's electrification ambitions.

Energy Storage & Product Integration Systems Engineer

Conduct component and product systems integration analysis for maximum performance and inter-operability. Manage product and systems requirements, specifications and flow down. Drive validation

Lead Product Engineer, Energy Storage & Solar Integration

This role will be directly involved in the product development engineering of integrated utility-scale solar+energy storage solutions as part of Fluence's suite of energy storage platforms. Our technology platforms are the foundation of the complete energy storage solutions we deliver to customers. Major responsibilities to include:

Wind Turbine Product Development Engineer: Energy Storage ...

Wind turbines require robust design, efficient operations, and smart control systems. The product development process in this sector includes not only mechanical and aerodynamical aspects but also the integration of energy storage systems that can help balance supply and demand.

Battery and Energy Storage Systems Expert , CECON LLC

Responsible for two main tasks relating to energy-storage for Allison Electric Drives; Design Release Engineer (DRE) for a production program and overseeing a lab to research and test multiple energy storage technologies and manufacturers.

Energy storage development and engineering

DNV has been supporting the development and engineering phase of renewable energy projects for thirty years. And we are now bringing all that experience to the energy storage sector, applying the techniques and approaches learned in wind and solar to deliver successful storage projects.
