

European Solar Energy Storage

Entrix gmbh Egypt

Overview

How does Entrix optimize the value of your energy assets?

We at Entrix optimize the value of your energy assets in real-time. Based on predictions of the energy system and energy markets, our solution trades your assets' capacity into the right markets at best possible prices – tailored to the changing circumstances of every single day. In everything we do, we take a full asset lifecycle perspective.

Why should you use Entrix?

By working with Entrix, you benefit from trading strategies that take into account your specific requirements, for example, the intended life-time of your hardware, other assets in your portfolio, or your risk-return-profile. “We partnered with Entrix on our very first battery storage project.

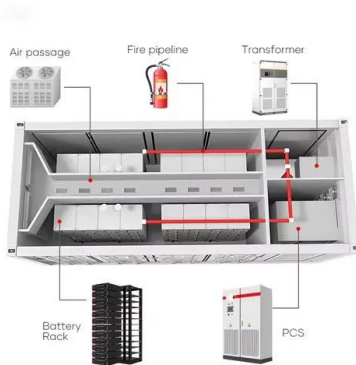

What sets Entrix up for success?

They set us up for success by creating an environment characterized by collective development and high performance. We are continuously looking for bright minds who share our vision to build a sustainable and clean future. Error: Contact form not found. At Entrix, we're a diverse team united by the quest to shape our energy future for the better.

What does it mean to be a part of the Entrix team?

Being a part of the Entrix Team means working cross-functionally in its true sense. To provide an all-round solution to our customers, we ensure to bring all functions together under value-driven domains where they can shape all components of the product together.

Entrix gmbh Egypt

Optimisation and Trading Platform for Energy Storage

The Entrix team supported us along the entire development process from the design and due diligence phase during our acquisition up until the successful sale to its today's owners. Their deep battery and energy markets expertise for example helped us to define the battery configuration and warranty parameters with the hardware manufacturer."

Aquila Clean Energy x Entrix Partnership for Two BESS Projects in

Located in Schleswig-Holstein and Lower Saxony, these projects have a combined power capacity of 106 MW and a total energy capacity of 212 MWh. Both are expected to become operational until early 2026 and will be optimised by Entrix, a leading specialist in AI-driven multi-market optimisation and trading for BESS. The projects are funded by [...]

Optimization & Trading Platform For Grid-Scale Batteries From Entrix

Germany's Entrix GmbH was an EM-Power AWARD 2024 finalist for its Battery Optimization Platform solution, which leverages battery storage to stabilize the grid and respond to frequency fluctuations. While the growing number of solar and wind farms contributes to the renewable energy mix, it also increases the complexity and unpredictability
