Equatorial Guinea serinus energy

Overview

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes.

What are the different types of energy transformation in Equatorial Guinea?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity.

What transformations are taking place in Equatorial Guinea in 2022?

No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions - during which up to half of their energy content is lost.

Is biomass a source of electricity in Equatorial Guinea?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Equatorial Guinea: How much of the country’s electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Equatorial Guinea-Israel relations

Israel recognized Equatorial Guinea right after it declared Independence and established diplomatic relations shortly after that, in 1968. In 1973, after the Yom Kippur War, Equatorial Guinea cut off diplomatic relations with Israel, as a part of the Sub-Saharan boycott of Israel. [citation needed] In January 1994, the two countries re-established their diplomatic relations. [2]

Will Equatorial Guinea rescue its dwindling energy industry?

Equatorial Guinea's domestic energy consumption is small - its population of around 1.75 million consumes only 4 percent of the country's oil output - which creates a sizeable surplus for exports. The country's location at an almost equal distance between the markets in Europe, Asia and North America gives it an additional advantage.

Panoro Energy Expands Equatorial Guinea E&P Portfolio

Independent energy firm Panoro Energy advanced its production portfolio in Equatorial

Guinea with a series of drilling activities and a new partnership in November 2024. This month, Panoro Energy brought one of its two infill wells at Ceiba field online and completed one infill well at the Okume Complex.

The "After Exxon" Begins New Oil and Gas Chapter for Equatorial Guinea

"In August 2024, Equatorial Guinea signed a bilateral agreement with Nigeria to jointly construct the Gulf of Guinea Gas Pipeline Project to supply gas feedstock to the Gas Mega Hub". The hub's output can also provide in-country poverty relief and climate improvement -- propelling economic growth and providing fuel for clean cooking.

Oil-Rich Mbanie Island Fuels Gabon-Equatorial Guinea Dispute

Key assets like Equatorial Guinea's Ceiba field and Gabon's Nyonie Deep 1 are poised to drive output, drawing interest from companies such as Perenco and Capitaine Energy. As energy security concerns grow, Gabon recently blocked an Assala oil asset deal to safeguard production, underscoring the stakes.
