Renewables & Microgrids , Saft , Batteries to energize the world

We provide turnkey solutions up to hundreds of MW's that integrate a Saft lithium-ion battery system with power-conversion devices as well as power control and energy-management functions. Saft's lithium-ion energy storage systems batteries are used for: Large renewable integration (PV and wind farm) installations

Home batteries

Home batteries. Home battery energy storage (home batteries) can be a great way to get the most out of your new or existing rooftop solar power system. Different battery energy storage systems (BESS) suit different needs, so it's important to do your research and seek advice on what's best for you.

Battery storage connections

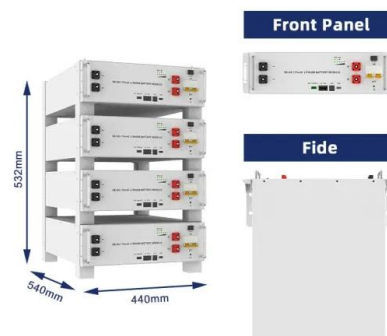

Battery storage connections. Before installing your battery storage system, you or your installer must submit an application to advise the intent to connect your battery storage system to the network. Generally, your battery installer will manage this process. They should follow

connection instructions provided by the manufacturer and by us

Large generation & batteries

Large generation & batteries An embedded generating system (such as solar) is one that is connected to an electricity distribution network rather than to the high-voltage transmission network. Embedded generating (EG) systems vary in type and size from a typical 1 kW domestic solar photovoltaic (PV) unit to a 50 MW wind farm, and may include

Solar

Customers may utilise a battery system to store the electricity generated in the day, which can be accessed at night when the sun is not out. Is solar right for you. Ergon Retail acknowledges the Traditional Custodians of the land on which we live and work, and recognise their continuing connection to land, waters and community.
