

European Solar Energy Storage

Estonia hdt energy

Overview

The National Energy and Climate Plan published in 2019 aims to reduce greenhouse gas emissions by 70% by 2030 and by 80% by 2050. Renewable energy must be at least 42%, with a target of 16 TWh in 2030. The plan was changed in October 2022, when Estonia set a target date of 2030 to generate 100% electricity from renewables.

Estonia's hydrogen energy sector scales up to meet future need

Estonia may not be sitting on massive oil deposits, but it does have plenty of wind, water, and, occasionally, sun. That may be enough to turn this country of islands, bogs, and ingenuity

into a hydrogen energy powerhouse, if its talents can put their heads together and work prodigiously. The country's hydrogen energy sector is inarguably young.
