Our company

European Energy was founded by Knud Erik Andersen and Mikael D. Pedersen in 2004. European Energy is a Danish company that started with the first onshore wind projects in Germany. In 2024, we were screening for projects in more than 25 countries and we have actual development activities in 23 countries.

Power-to-X

Power-to-X. What is Power-to-X? Power-to-X (PtX/P2X) is the process of turning electricity (power) into sustainable green products (the "X"). The input to this process is renewable power from solar panels, wind turbines, etc., and the output is a ...

Solar

Solar energy continues to be one of the most profitable energy solutions, with panels becoming more efficient and technological developments happening fast. Technologies such as agri-pv where renewable energy production is combined with agricultural growth in the same space show promising results and is an area that we will continue to explore

European Energy to start construction on its first solar farm in Latvia

In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's 1,165 MW, while Latvia's stood at only 500 MW. The new European Energy project will significantly ...

European Energy Breaks Ground on Latvia's Largest Solar Farm

European Energy has begun constructing Latvia's largest solar farm, boasting a capacity of 148 MW and featuring 240,000 solar panels. The solar farm will produce around ...

Smart energy

Notably, major players in the energy sector are actively exploring hydrogen technologies for use as energy storage units, with the prospect of later utilization in various processes. Latvia has the best location to establish a business in Northern Europe. Just look at the map! Latvia is at the heart of Europe's fastest-growing area

European Energy divests half of Latvian solar park to Sompension

1 ??· Copenhagen, Denmark, 20th of December 2024 - The solar park is under construction and is expected to be completed in the fourth quarter of 2025 has a capacity of 148 MW and is expected to generate electricity equivalent to the consumption of over ...

European Energy Latvia on LinkedIn: #energystorage ...

European Energy team is participating in the Energy Storage Summit Central Eastern Europe 2024. According to the presentation of the representative of International Energy Agency (IEA): "To meet

European Energy receives EU Innovation Fund grant for Green ...

Copenhagen, Denmark, 23 October, 2024 - European Energy has been awarded a grant by the EU Commission under the EU Innovation Fund for an upcoming green methanol facility in Denmark.

Construction of Europe's largest battery park in Estonia

The project, aimed at preparing Estonia, Latvia and Lithuania to integrate their electricity networks with European ones by 2025 and thus shaking off their reliance on the Russian grid. Planned battery storage park of 200 MW and 400 MWh of storage capacity equivalent to 90 000 households' energy.

Sustainability

Nature must be protected- no exemption for renewable energy developers. Sep 09, 2024. Press release. The Danish Society for Nature Conservation and European Energy Enter a New Nature Agreement. Feb 19, 2024. Case. Using the same land twice at European Energy's Flakkebjerg Solar Park. Dec 20, 2023. Case.
