

European Solar Energy Storage

European energy storage project database

European energy storage project database

The European Energy Storage Inventory: A comprehensive ...

This innovative tool systematically catalogs all energy storage projects within Europe, from the first planning phase to operational operation.

Market Analyses , EASE: Why Energy Storage? , EASE

The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets in over 29 countries, it is the largest and most detailed archive of European storage.

EU launches real-time dashboard for energy storage expansion

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

New EU Tool Tracks Real-Time Energy Storage Across Europe

A new interactive platform--the European Energy

Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, marking a major step toward a smarter and more sustainable energy system.

European Energy Storage Inventory , JRC SES

Explore the European Energy Storage Projects Dive into the map of Energy Storage Projects using interactive tools and filter options by status, technology, subtechnology, and more.

EMMES 9.0

The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets from over 27 countries, making it the most comprehensive archive of European storage.

14 GW of energy storage capacity under construction in Europe

According to the European Commission, the European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. The users can dive into the map of Energy Storage Projects using interactive tools and filter options by status, technology,

subtechnology, and more.

New EU Platform Highlights Over 1771 Energy Storage Projects

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy storage projects across Europe.

Database of the European energy storage technologies and facilities

The purpose of this database is to give a global view of all energy storage technologies. They are sorted in five categories, depending on the type of energy acting as a reservoir. Relevant types of data for each technology have been highlighted.
