The Pitcairn Islands

The Pitcairn Islands are located in the central South Pacific, almost exactly midway between New Zealand and Peru, each being approximately 5500 km distant. The islands are positioned between longitudes 131° and 124°W and latitudes 23° and 26°S, and access is by sea only (Fig. 34.1) takes 36 hours to reach Pitcairn by ship from Mangareva (the nearest ...

Pitcairn Islands

Various forms of evidence show the earliest settlers of the Pitcairn Islands were Polynesians who occupied Pitcairn and Henderson for several centuries until the islands were abandoned: Henderson most likely before the 16th century and Pitcairn in the 17th or early 18th century. The islands were uninhabited when they were discovered by Europeans.

Home

A large part of Pitcairn Island's early history will forever remain a mystery. The full history of both the earlier Polynesian community and of the Bounty settlers will never be completely known.[See "Pre-Mutineer History"] Differing theories and contradicting stories concerning the events that took place after the mutineers arrived at Pitcairn, have been told.

Bringing Renewable Energy to Pitcairn Island

Following an EU commissioned study in 2017, the EU agreed to fund a Renewable Energy project for Pitcairn to replace fossil fuel with Solar Power under the EDF 11 Regional Envelope and we have been working with our partners in New Caledonia who manage the project on behalf of the four Pacific EU Overseas Territories.
