Exagrid datasheet Hungary

Overview

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage. When comparing ExaGrid appliances deduplication in the backup application software, it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup.

How do I contact ExaGrid?

One Raffles Place Tower 2 / 048616 / +65 6808 5574 ExaGrid reserves the right to change specifications or other product information without notice. ExaGrid and the ExaGrid logo are trademarks of ExaGrid Systems, Inc. All other

What are checksums used for in ExaGrid?

checksums are used to validate the replicated data as well. The ExaGrid software continually scrubs the repository data, confirming checksums and automatically repairing any deduplicated data that does not match its checksum using data from remote site(s). This automatic repair of

DETAILED PRODUCT DESCRIPTION ExaGrid Tiered Backup ...

ExaGrid's innovative approach to data deduplication minimizes the amount of data to be stored by using zone-level data deduplication across all received backups . ExaGrid's patented zone ...

UNIX / LINUX File System Data Dumps

ExaGrid customers can simply transfer file system data from Unix or Linux systems to the ExaGrid server, bypassing the use of a backup agent. ExaGrid delivers a 10:1 to 50:1 deduplication ratio and can replicate the deduplicated data to an offsite disaster recovery location as well as report deduplication ratios by the individual UNIX/LINUX backup jobs.

DETAILED PRODUCT DESCRIPTION ExaGrid Tiered Backup ...

ExaGrid Appliances Connect to Form a Single Scale-Out System ExaGrid appliances are comprised of processors, memory, networking,

IPMI, RAID 6, and a hot spare drive per appliance, using enterprise-class SAS drives and ExaGrid software . See the ExaGrid Technical Specifications data sheet for more details .

Data Deduplication

Download Data Sheet. ExaGrid's Tiered Backup Storage took a more innovative path. ExaGrid uses zone-level deduplication, which breaks data into larger "zones" and then performs similarity detection across the zones. With ExaGrid's Tiered Backup Storage, each appliance in the system brings with it not only disk, but also memory
