# Extreme solar Senegal

## Overview

---

The Diass Power Station (: Centrale solaire de Diass) is a 23 MW (31,000 hp) in . The power station was commissioned on 22 May 2022 by the President of Senegal and his guest , the . The solar farm is owned and operated by (Senelec), the national public electricity utility parastatal company. The power station was constructed with loan financing from the

Will two solar plants be built in Senegal's southern Casamance region?

DAKAR, Nov 13 (Reuters) - Two solar plants with a combined 60 megawatts (MW) capacity and battery storage will be built in Senegal's southern Casamance region to electrify rural areas, Africa-based project developer Axian Energy said on Wednesday.

Does Senegal have a solar power plant?

In addition to acquiring 112 MW of installed solar capacity, Senegal is also focusing on wind and biomass. The Senegalese government recently inaugurated the Diass solar power plant located 40 km south-east of the capital Dakar. The installation, which has a capacity of 23 MWp, was financed by the German Development Agency (KfW).

Who owns Senegal's solar farm?

The power station was commissioned on 22 May 2022 by the President of Senegal Macky Sall and his guest Olaf Scholz, the Chancellor of Germany. The solar farm is owned and operated by Société nationale d'électricité du Sénégal (Senelec), the national public electricity utility parastatal company.

How much electricity does Senegal have?

Currently, Senegal has an installed capacity of 1,555 MW according to Power Africa. Although its electricity mix is still largely dominated by fossil fuels, this West African country has made remarkable progress in terms of renewable energy development.

Which Senegal power plants have a 60mwac capacity?

The two plants that launched operations last month are located in Kael and Kahone in Western Senegal and have a total capacity of 60MWac.

Who financed the Senegalese solar park?

The construction of the solar park was financed with a loan from the German development agency Kreditanstalt für Wiederaufbau (KfW). The plant has been designed to operate for 25 years. According to the authorities, the plant is capable of supplying 33,000 Senegalese households.

## Senegal

The planned Scaling Solar projects underscore Senegal's commitment to integrating renewable energy resources into its energy mix. The successful tender set a new benchmark for the region. With prices under 4 US cents per kWh, solar energy will become Senegal's cheapest energy source.

## Moon, a solar kit connected and innovative

Sunna has also received numerous prizes for their solar panel technology which is highly resistant to extreme temperatures. Having such experience, the company started to become concerned for people without access to electricity and thanks to their Nanogrid solution (an energy prepayment plan) started many pilot projects in Senegal.

## Senegal Solar: Uninterrupted Power for Vital Medical Care

Schott Solar regularly tests its modules under extreme temperature fluctuations, permanent humidity and high pressure and suction and, as far as the company is aware, they are the only manufacturer which uses criteria that are twice as strict as those stipulated by the IEC 61215 standard: the modules are subjected to temperatures of +85°C and

## Scaling Solar Kahone, Senegal

The project benefits from a 25-year take-or-pay PPA with Senelec backed by a State Guarantee from the State of Senegal. With this 44 MWp solar PV plant, Meridiam is reaffirming its ambition to become a key player in the clean energy sector in Senegal and in Africa. The plant produces 77 GWh per year of electricity at a competitive price and
