Design My System is an online tool that lets you create your own solar energy system in minutes. You can choose your system size, battery capacity, inverter type, and other components based on your location, roof size, energy consumption, and budget. You can also see the estimated cost, savings, payback period, and environmental impact of your system.

EP Cube offers significant savings in system installation time and cost. The EP Cube storage system allows the storage and use of green electricity, generated by photovoltaic systems, thus reducing dependence on the grid, helping to reduce CO 2 emissions and enabling cost saving. EP Cube (Single-phase version) Green and cost-savingHow does the EP Cube work?

The EP Cube supports Ethernet and WiFi connection. Through the EP Cube application, the user can remotely manage the system's operating mode, minimising energy costs, and monitor the storage status in real time, thus optimising self-consumption. Moreover, the system also allows OTA (Over-The-Air) firmware updates, ensuring optimal operation.
