

## European Solar Energy Storage

# Federal government solar grant United Arab Emirates

## Overview

---

Are Emirates considering solar energy?

A number of the emirates are considering solar energy, both solar PV and CSP, and are carrying out feasibility studies in relation to the feasibility of solar projects, such as floating solar PV, as well as considering other types of renewable energy, including wind energy and waste-to-energy; some of which are currently under procurement.

Is the United Arab Emirates a good country for solar energy?

The United Arab Emirates (UAE) has one of the highest solar exposure rates in the world, making it eminently suitable for producing solar energy. In 2017, the UAE launched its Energy Strategy 2050 (the Strategy), the first unified energy strategy in the UAE to balance supply and demand.

What is the future of energy in the UAE?

The focus is very much on solar energy (primarily solar PV); however, there are ambitious plans around green hydrogen, as well as opportunities for wind, hydro, storage and waste-to-energy. In 2023, the UAE hosted the UN Climate Change Conference, COP28.

Who regulates electricity in the UAE?

The Federal Ministry of Energy and Infrastructure regulates the sector at a federal level. Electricity services are expressly reserved to the Federal Government in accordance with article 120 of the UAE Constitution.

What are the different solar power plants & projects in the UAE?

This page provides information about the various solar power plants and projects in the UAE. Al Dhafra Solar PV is the world's largest single-site solar power plant. The 2GW Al Dhafra Solar PV plant was inaugurated in November 2023. It was built in a single phase.

Do IPPs provide solar power in the UAE?

More than 90% of power generation in the UAE is now provided by IPPs, requiring contractors/investors to have the required experience and expertise in constructing and operating solar facilities.
