

## European Solar Energy Storage

# Fiji stavio renewables

## Overview

---

What renewable resources are available to Fiji?

The analysis of data for different sources of energy demonstrates that the potential renewable resources available to Fiji are hydropower, solar energy (photovoltaic and thermal), bioenergy, wind energy, ocean energy, tidal energy and geothermal energy.

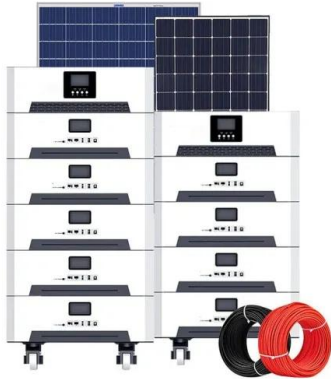

Is Fiji introducing renewables to generate green power?

As a developing nation with its increasing energy demands, Fiji is in the process of introducing renewables to generate green power to minimize its reliance on fossil fuels and to minimize greenhouse emissions. The paper focuses on green power generation with the available renewables.

How many MW biomass power stations are being installed in Fiji?

A 3 MW biomass power station is being installed by EFL consuming 26,000 tons of biomass feedstock annually supplied by the Fiji Hardwood Corporation. Another 2 MW biomass power station is to be installed in Savusavu that would produce 22,000 tons of coconut tree waste as a biomass feedstock.
