## Finland's weather and light

Finland's coast is sunnier than the interior and has less rainfall. At the beginning of summer it is very sunny on the coast because the sea breeze from the cool sea keeps the rain clouds inland in the afternoon. Only towards evening can they move from inland towards the coast as the wind weakens. When there is a strong ridge of high pressure

## Winter in Finland 2024-2025

Winter is the longest season in Finland. It usually begins around November in most of the territory, though a little later in the southern and coastal regions. In Lapland, it can start as early as mid-October. In most territories, the winter season lasts for about 100 days until late March or even

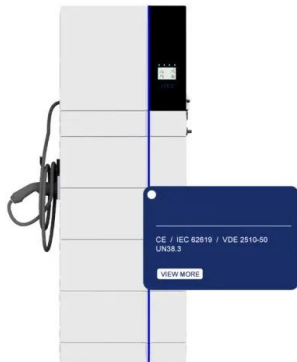

## Winter in the Outdoors

The winter sun provides a lot less light than in the summer. During December, the sun sets in the early afternoon in southern Finland, while in Lapland the polar night keeps the days dusky for weeks. However, a lack of light is no reason to stay home. You can do your trip during the hours that get the most sunlight, and a good headlamp helps
