

European Solar Energy Storage

Foreign energy storage experience

Overview

What will the energy storage industry look like in East Asia & Pacific?

Additionally, in many of these areas the industry is likely to adopt a more distributed approach to grid development, using more local power generation and microgrid systems. We expect that the largest energy storage market in the East Asia & Pacific region will be China.

Can emerging markets benefit from energy storage?

In emerging markets around the world, there is only limited experience with energy storage, yet vast potentials exist to benefit from the technology. Many of these markets share similar energy market dynamics and needs for new resources.

Can energy storage technologies help drive development in emerging economies?

Energy storage technologies hold significant potential to help drive development in emerging economies by improving the quality of the electricity supply and facilitating the effective integration of renewable energy.

Do emerging economies need energy storage?

While the costs for renewable generation continue to fall, integrating and effectively using these new resources, especially in regions with weak grid infrastructure, will require energy storage. Furthermore emerging economies must bring reliable electricity service to about 1.2 billion people who currently lack access.

Are emerging markets a hotspot for energy storage?

Energy storage projects exist and thrive in several geographies, but a number of emerging market countries have the resource potential to be among the most active participants in energy storage today. We expect that select

emerging markets will be hotspots of storage activity over the next five to fifteen years.

What is the potential for energy storage development in the Middle East & North Africa?

The potential for energy storage development in the Middle East and North Africa is driven mainly by a rapidly growing urban population throughout the region, as well as by expected additions to renewable energy capacity.
