

## European Solar Energy Storage

# Foreign enterprise energy storage industry

## Overview

---

How can manufacturers capitalize on energy storage trends?

To capitalize on this trend, manufacturers should focus on market insights and plan for new opportunities. Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level.

Should energy storage be developed?

Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level. As a result, InfoLink maintains a cautiously optimistic outlook for the medium- to long-term development of energy storage systems.

Why is 2024 a good year for energy storage?

2024 is the start of energy storage in the Middle East and Africa, with 2.7 GWh of capacity. Key points: Tender projects surged, exceeding 40 GWh, mainly from the UAE and Saudi Arabia. China-funded companies led, winning most announced projects. Intense competition lowered bid prices compared to other regions.

## Foreign enterprise energy storage industry

---

### Foreign Enterprise Energy Storage Industry

Despite the effect of COVID-19 on the energy storage industry in 2020, internal industry drivers, external policies, carbon neutralization goals, and other positive factors helped maintain rapid, large-scale energy storage growth during the past year.

### foreign enterprise energy storage industry

This book focuses on the global economy, oil industry, natural gas industry, hydrogen energy industry, wind power industry, and low-carbon market in the post-pandemic era of China and the whole world.
