

European Solar Energy Storage

Franklin solar battery Papua New Guinea

Overview

Is solar energy the future of Papua New Guinea?

To be precise, 60% of households in Papua New Guinea rely on off-grid solar for daily lighting needs. The government of Papua New Guinea targets to electrify 70% of the country by 2030. There is no doubt that solar energy will play a critical role in the attainment of this goal.

How much electricity does Papua New Guinea have?

An estimated 12% of Papua New Guinea's population has access to on-grid electricity. The country's power supply network is extensively unreliable, and blackouts are the order of the day. It relies heavily on oil and diesel, even though it has a huge potential for hydro and solar power generation.

Is Papua New Guinea the world's largest off-grid solar market?

Although on-grid solar lighting is a cause for concern, the country has emerged as one of the world's largest off-grid solar markets. To be precise, 60% of households in Papua New Guinea rely on off-grid solar for daily lighting needs. The government of Papua New Guinea targets to electrify 70% of the country by 2030.
