

European Solar Energy Storage

French Polynesia signal energy solutions

Overview

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities.

How much electricity does French Polynesia use?

French Polynesia, whose per capita gross domestic product is the second highest among Pacific Islands, is also above average in its per capita electricity consumption. Electricity per inhabitant is 2468 (kWh).

How much electricity does Tahiti use?

Electricity per inhabitant is 2468 (kWh). Tahiti has a goal of reducing its fossil fuel consumption and shifting to renewable sources of electricity generation by 50% by 2020, yet it only had 26% in renewable energy in 2014 (Hourçourigaray et al., 2014).

Does Tahiti have a refinery?

Tahiti imports its petroleum and has no local refinery or production (French Polynesia Population, 2014). The Pacific Islands are home to some of the countries that are most at risk from the effects of climate change.

French Polynesia signal energy solutions

Tourism To Boost Sluggish Economic Activity In French Polynesia

We at Fitch Solutions expect a modest improvement in GDP growth in French Polynesia in the coming years and to rise to 2.3% in 2019 and 2020, from an average of 0.8% between 2012-2017, on the back of robust growth in tourism and investment into new development projects.

Energy performance assessment of Sea Water Air

Tahiti and the other islands of French Polynesia are well-suited for SWAC thanks to the steep drop-off to more than 900 m close to the coast, allowing relatively easy access to deep ocean water at about 5 °C. The first SWAC in French Polynesia was developed by Pacific Beachcomber SA for the Intercontinental hotel in Bora Bora in 2006.
