## France sets sail for 32% renewables in energy mix by 2030

The law on energy transition for a green growth, as the bill is called, also targets to halve the country's overall energy consumption by 2050, decrease the share of nuclear energy in the energy mix to 50% by 2025 and lower the share of fossil fuels by 30% by 2030. Progress will be measured against the 2012 levels.

## Moving renewables and emerging technologies forward

Companies outside the traditional energy space also pursue similar initiatives to reduce their carbon footprint and meet stakeholder pressures. In our PwC 2023 US Large Energy User Survey, 74% of leaders from across industries said they have comprehensive energy strategies that include moving to sustainable and renewable energy sources. More
