# Ganfeng lithium energy storage business

## Overview

---

As the world's leading lithium eco-enterprise, Ganfeng Lithium's business segments cover from upstream 'lithium resource development', midstream 'lithium refinery and lithium metal smelting', to downstream 'lithium battery manufacturing and battery recycling'. What is ganfeng lithium?

As the world's leading lithium eco-enterprise, Ganfeng Lithium's business segments cover from upstream 'lithium resource development', midstream 'lithium refinery and lithium metal smelting', to downstream 'lithium battery manufacturing and battery recycling'.

When will ganfeng lithium integrate its battery business?

In May 2020, Ganfeng Lithium will integrate all its battery businesses into Ganfeng Lithium Technology Co., Ltd. With the integration of the lithium battery business, the expansion of Ganfeng's lithium battery business will further accelerate.

What is ganfeng lithium's future development strategy?

As an important layout in the upstream and downstream integration strategy of Ganfeng Lithium, the lithium battery segment represented by Ganfeng Lithium is one of the Group's future development focuses.

When did Dongfeng start working with ganfeng lithium?

Dongfeng started setting up its solid-state battery project in 2018 and began working with Ganfeng Lithium on the development of first-generation solid-state battery systems in July 2019. In June 2021, Dongfeng signed a strategic partnership agreement with Ganfeng Lithium to create a solid-state battery demonstration operation project.

Is ganfeng lithium working on a second-generation all-solid-state battery?

Ganfeng Lithium has a production line for a second-generation all-solid-state battery up and running, with a volume production capacity. The energy

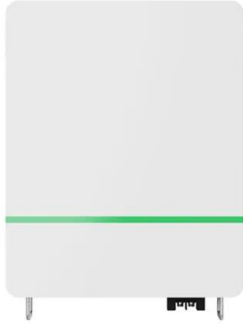

density of this battery is over 360Wh/kg, according to the company.

Where are ganfeng's lithium resources located?

Ganfeng's lithium resources are located in several countries and regions worldwide, and we have advanced technologies for 'lithium extraction from brine', 'lithium extraction from ore', and 'lithium recycling'. Our production capacity of lithium compounds and lithium metals is among the highest in the world.
