## Germany sunshine energy

---

### How many hours of sunshine are there in Germany?

As the country continues to prioritize sustainability and clean energy sources, it is likely that the amount of sunshine will play an increasingly important role in shaping Germany's energy future. Germany experiences an average of 1,600 hours of sunshine per year, making it one of the sunnier countries in Europe.

## The energy transformation in Germany: status and progress

Germany is aiming to be climate neutral by 2045 - five years earlier than the European Union. In order to meet this ambitious target, the energy supply has to be fundamentally transformed: after all, this is where most greenhouse gas emissions occur. A lot has to happen at all levels in a relatively short time: fossil fuels such as coal, oil and natural gas - still the most ...
