

## European Solar Energy Storage

# Government releases energy storage regulation plan

## Overview

---

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. – The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE’s investment in future planning of energy storage research, development, demonstration, and deployment projects.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Will the DOE repost the SRM?

The DOE, at its discretion, anticipates reposting the SRM in draft form at a later time for public comment to inform the final version of the SRM. Learn more about DOE’s energy storage activities supporting DOE’s energy storage mission and vision through the Energy Storage Grand Challenge.

Is DOE preparing a draft energy storage SRM for public comment?

DOE is seeking comment from stakeholders to inform its draft Energy Storage SRM for public comment at a future time; notice of its availability will be provided through the Federal Register through a formal NOA. Interested stakeholders can view both the draft SRM and the official NOA.

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaptation, demonstration programs, financial incentives, and

consumer protections. Below we give an overview of each of these energy storage policy categories.

What is Virginia's energy storage goal?

Virginia's target was enacted by law in 2020, which set a 3,100 MW energy storage goal by 2035. A law enacted in 2021 directed the Illinois Commerce Commission to establish storage procurement targets for all utilities serving more than 200,000 customers to achieve by 2032.

## Government releases energy storage regulation plan

### Special Report: How Will the New US Government Impact Energy Storage

Tariff uncertainty has had a particularly damaging impact on the solar industry in the past and there are fears that it could have a similarly destabilising effect on energy storage. [Read the full report here.](#)

### Energy Storage Strategy and Roadmap , Department of Energy

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

### Energy Storage Strategy and Roadmap , Department ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

### Special Report: How Will the New US Government ...

damaging impact on the solar industry in the past and there are fears that it could have a similarly destabilising effect on energy storage. Read the full report here.

## State by State: A Roadmap Through the Current US Energy Storage ...

The BPU proceeding to finalize the proposal remains ongoing. On August 8, 2023, the BPU opened a request for information seeking comments on revisions to its September 2022 energy storage incentive framework.

## DOE releases energy storage strategy and roadmap

The US Department of Energy (DOE) has released its draft Energy Storage Strategy and Roadmap (SRM), a plan providing strategic direction and opportunities to optimise DOE's energy storage investments ahead of the incoming Trump administration.

## Draft Energy Storage Strategy and Roadmap Update Released

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies that can meet all U.S. market demands by 2030.

## DOE releases energy storage strategy and roadmap

The US Department of Energy (DOE) has released its draft Energy Storage Strategy and Roadmap (SRM), a plan providing strategic direction and opportunities to optimise DOE's energy storage investments ...

## Government regulations juicing trends in energy storage

Energy storage is critical for mitigating the variability of wind and solar resources and positioning them to serve as baseload generation. This series investigates the ways in which organizations in the energy sector can navigate the evolving energy storage landscape.

## US energy storage needs national standards and regulations to ...

In a wide-ranging report, released March 30, the Government Accountability Office outlined some of the challenges facing energy storage and detailed the planning, regulation and market

## Draft Energy Storage Strategy and Roadmap Update ...

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies that can meet all U.S. market demands by 2030.

## U.S. Department of Energy Releases Energy Storage Strategy ...

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies that can meet all U.S. market demands by 2030.

## Government regulations juicing trends in energy ...

Energy storage is critical for mitigating the variability of wind and solar resources and positioning them to serve as baseload generation. This series investigates the ways in which organizations in the energy sector can

navigate ...

## government releases energy storage regulation plan

On October 8, Shanxi Provincial Energy Bureau released the "14th Five Year Plan" Implementation Plan for the Development of New Energy Storage, which specified that the planned capacity of new energy storage would reach 6GW by 2025.
