Delivery

ONE-STOP SOLUTION

65kWh 30kW

130kWh 30kW

130kWh 60kW

Overview

State aid is granted in lei in the form of reimbursement of eligible expenses incurred and cannot exceed 100% of the eligible expenses of the project and ten million euros/enterprise/project, and the value of state aid granted per MWh of installed storage is a maximum of 100,000 euros.

State aid is granted in lei in the form of reimbursement of eligible expenses incurred and cannot exceed 100% of the eligible expenses of the project and ten million euros/enterprise/project, and the value of state aid granted per MWh of installed storage is a maximum of 100,000 euros.

The Romanian Ministry of Energy has launched into public debate a new state aid scheme of 150 million Euros financed by the EU Modernisation Fund for investments in energy storage solutions (i.e., batteries). A national call for projects will be opened and the following criteria must be respected.

Scheduled to be launched on March 1, two public calls in Romania will enable companies to get a total of EUR 815 million in grants for renewable electricity projects. Minister of Energy Sebastian Burduja said that the subsidies would cover 2 GW. The package is from EU funds of EUR 17.6 billion in.

The European Commission has approved, under EU State aid rules, a €103 million Romanian scheme to support the construction of electricity storage facilities. The measure will be partly funded by the Recovery and Resilience Facility ('RRF'), following the Commission's positive assessment of the.

The call for projects "Supporting investments in the development of electricity storage capacities (batteries) with financing from the Modernization Fund" is extended by one month, namely until February 17, 2025, the Ministry of Energy announced. Initially, the deadline for submitting projects to.

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities - wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to.

Romania is making significant strides in its commitment to sustainable energy by offering subsidies to local authorities to bolster the installation of solar power systems. This forward-thinking initiative is designed to empower municipalities to receive funding for projects that generate. Does Romania offer a subsidy for battery energy storage systems?

From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday. Bids will be accepted until January 17, 2025.

Does Romania have a grant program for battery energy storage systems?

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities – wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million).

How long will CfDs last in Romania?

The CfDs will secure a fixed price for 15 years under a EUR 3 billion support mechanism, also from the Modernisation Fund, Burduja explained. They are expected to cover 5 GW through two rounds, in 2024 and 2025, he said. Burduja said he vowed to accelerate all investment programs and transform Romania into a regional energy hub.
