

European Solar Energy Storage

Government subsidy for container solar kit in Tunisia

Overview

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

The report acknowledges Tunisia's significant potential but notes that the country's post-COVID economic recovery continued to be moderate (real GDP grew by 2.5 percent in 2022) due to the current pace of economic reforms, resulting in regulatory barriers to growth. Additionally, the report.

Les kits solaires en Tunisie combinent panneaux photovoltaïques, onduleur, et batteries pour produire de l'électricité. Captant le rayonnement solaire, les panneaux le convertissent en courant continu. L'onduleur transforme ensuite ce courant en alternatif, utilisable par les appareils électriques.

Recognising the need to address its increasing energy deficit and heavy dependency on fossil fuels, Tunisia has committed to pursuing an energy

transition path based on the development of renewable energies and energy efficiency. Through a national programme (Tunisian Solar Plan, TSP) approved by.
