# Government subsidy for mobile foldable pv system in Argentina

## Overview

---

Why do we need subsidies in Argentina?

Similarly, subsidies can provide additional support to projects that align with national development goals, making investment in specific industries more appealing. By utilizing these strategies, Argentina aims to create a competitive edge that can stimulate capital inflow, enhance employment opportunities, and foster innovation.

What is the RenovAr program in Argentina?

El RenovAr Program, driven by the government, has been key. Its objective is to increase the share of renewable energy in the country's energy matrix, which currently covers only 2%. However, Argentina has set itself the ambitious goal of covering the 20% of its energy matrix with renewable energies by 2025.

How can solar power benefit Argentina?

By promoting the use of residential solar, Argentina could take advantage of land in rural areas that receive a significant level of radiation and bring jobs and economic development to poorer areas of the country.

How does the Argentine government support foreign direct investment?

In conclusion, the Argentine government's robust support system encompasses various agencies and online resources designed to streamline the investment process. Through these initiatives, the government not only promotes foreign direct investment but also strives to create a conducive environment for sustainable economic growth.

What is Argentina's tax incentive framework?

Another critical aspect of Argentina's tax incentive framework involves tax credits. These credits are direct offsets against tax liabilities, further reducing the payable amount for foreign investors. For example, certain sectors, such

as renewable energy or technology, may receive specific credits that promote investment in these areas.

Does Argentina have a problem with PV adoption?

Argentina is by no means the only country to be stuck in a difficult situation with PV adoption. But with the amount of land well-suited to PV use, it is disappointing to see this degree of underutilization.
