Overview

The Islands Energy Program team hasn't found an instance yet "where importing natural gas, diesel, propane or other fossil fuel for power generation is cheaper than the combination of.

Three pillars support the program. The first is strategic planning that enables island governments, private and public-sector enterprises to undertake national clean energy transition.

Those characteristics led Shell to propose investing very large sums of capital to build out a 220–250-MW natural gas power plant. "It's still early days. There's no PPA [power].

In addition to allocating government funds to rebuild a school, medical clinic, administrator's office, Post Office, court, police station and accommodations, the PM announced the government would issue a request for proposals (RFP) to develop a 390-kW solar-storage microgrid on the island.
