

## European Solar Energy Storage

# Government subsidy for mobile solar unit in Norway

## Overview

---

What are the new solar rebates in Norway?

Norway's clean energy agency Enova will increase the maximum PV system size eligible for rebates from 15 to 20 kW and the maximum subsidy amount from 1,250 to 2,000 NOK (\$226.7) per kW installed. In addition, new subsidies of up to 10,000 NOK will be introduced for energy management systems that are often installed alongside solar arrays.

How much solar power does Norway have in 2023?

In 2023, solar PV provided 1% of the electricity into the Finnish grid (Electricity Maps, 2024). Norway, having had plenty of hydropower, only recently began to tap into solar energy. The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023.

Is solar energy a viable option in Denmark?

The government supports solar PV installations through net metering schemes and tax exemptions, making solar energy a viable and attractive option. Denmark's commitment to integrated energy systems and smart grid technologies further enhances the potential of solar PV, integrating it seamlessly into the national energy mix.

What is solar Norway & how does it work?

Solar Norway has built solar panels on the roofs of 11 shopping centres in Vietnam, which means that the centres are powered by clean energy. The project is supported by Norad's business support scheme, which helps to attract investors and other financing opportunities by reducing risk. Credit: Christopher Brandt/ Norad.

How much solar power does Norway have?

The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported

a total installed capacity of around 0.6 GW by the end of 2023. About half of the capacity is installed on households - the rest for industrial and commercial use, with a very limited Utility scale solar.

Why are solar PV installations increasing in Sweden?

In Sweden, solar PV installations have grown exponentially. As of 2023, the country had a total installed solar PV capacity of 4.1 GW. This surge is largely attributed to government initiatives such as investment support schemes, which cover up to 20% of the installation costs for solar PV systems.
