

## European Solar Energy Storage

# Government subsidy for mobile solar unit in Switzerland

## Overview

---

At the federal level, Pronovo AG administers the one-time investment subsidy (Einmalvergütung, EIV) for photovoltaic (PV) systems. This subsidy is calculated based on the system's size, type (roof, facade, or free-standing), and technical specifications.

At the federal level, Pronovo AG administers the one-time investment subsidy (Einmalvergütung, EIV) for photovoltaic (PV) systems. This subsidy is calculated based on the system's size, type (roof, facade, or free-standing), and technical specifications.

This article provides an overview of the main national solar incentive programs available to homeowners, businesses and organizations looking to install solar panels in Switzerland. The aim is to explain current opportunities to receive subsidies and rebates for going solar nationwide. The Swiss.

Einmalvergütungen und die gleitende Marktprämie sind die Instrumente des Bundes zur Förderung von Photovoltaikanlagen (PV-Anlagen). Es gibt Einmalvergütungen für kleine PV-Anlagen (KLEIV, bis zu einer Leistung von 100 kW) und Einmalvergütungen für grosse Anlagen (GREIV, ab 100 kW), welche maximal.

The federal government and the cantons promote the use of solar energy with various funding programs. The most important funding programs for photovoltaics are the cost-covering remuneration for feed-in tariffs (KEV) and the investment contributions for solar power plants. Depending on the output.

In addition to the legal mandates, the Swiss Confederation, cantons, and municipalities offer a wide range of financial incentives to encourage the adoption of photovoltaic systems. These subsidies and benefits can significantly reduce your initial investment costs and lead to substantial long-term.

Switzerland has announced a new one-off incentive model for solar, in order to reimburse up to 60% of investment costs for installations that meet certain criteria. The scheme exists in addition to nonrecurring remunerations for small

and large PV installations. From pv magazine France On Jan. 1.

The federal government and some cantons and municipalities are therefore supporting the construction of solar power plants with substantial investment subsidies. At national level, both solar power plants for self-consumption and for full feed-in are subsidised. For a system with 300 kWp, this.

## Government subsidy for mobile solar unit in Switzerland

### Photovoltaics

Photovoltaics in Switzerland are funded at the federal level by Pronovo. There are also funding programs from individual cantons, municipalities and energy suppliers. Photovoltaic systems ...

### State Funding & Market

With the Energy Strategy 2050, Switzerland wants to structure its national electricity market in a CO<sub>2</sub>-neutral way. The federal government and some cantons and municipalities are therefore ...

### **Subsidies for energy projects: Apply for subsidies now**

We support sustainable energy projects with subsidies. If you produce electricity or heat from renewable sources, equip your building with charging infrastructure for electric vehicles or ...
