

European Solar Energy Storage

Government subsidy for mobile solar unit in Tunisia

Overview

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe. In addition, a network code has been drawn up to ensure the efficient integration of renewable energy.

Major investments in solar power could be coming to Tunisia after the local government granted building licenses to multiple international solar companies. The North African country awarded more than \$386 million worth of licenses to solar firms from France, Norway, and Japan. The projects will be.

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. The GoT plans to reach 35% of renewable energy in the electricity system capacity by 2030, against 3% currently. Renewable energy is then expected to cover 50% of the electricity needs by.

The Tunisian Solar Plan (PST) is the national program aiming at reaching the renewable energy development strategy targets. The goal is to increase the total share of renewables in the electricity generation mix from 3% today to 30% by 2030. In order to reach these targets, Tunisia has implemented.

Tunisia is targeting 35% of renewable energy in its energy mix by 2035,

representing circa 3,800MW. To achieve this objective the Tunisian Government is launching a series of solar and wind tenders across the country, between two regimes: The tenders are launched on an annual basis for sites. What is Tunisian Solar Program?

Tunisian Solar Programme, launched in 2005, is a joint initiative of UNEP, Tunisian National Agency for Energy Conservation, state-utility STEG and Italian Ministry for Environment, Land and Sea. The program aims to promote the development of the solar energy sector through financial and fiscal support.

Who is implementing the Tunisian Solar Plan?

The Tunisian solar plan is being implemented by STEG Énergies Renouvelables (STEG RE) which is a subsidiary of state-utility STEG and responsible for the development of alternative energy sector in the country.

How many MW will Tunisia produce in 2030?

According to the Energy General Direction of the Tunisian Ministry of Energy and Mines, 650 MW will come from solar photovoltaic, while the residual 350 MW will be supplied by wind energy. Under new plans, Tunisia has dedicated itself to generating 30 per cent of its electrical energy from renewable energy sources in 2030. Loading.

How much money is needed to implement the Tunisian Solar Program?

The total investment required to implement the Tunisian Solar Program plan have been estimated at \$2.5 billion, including \$175 million from the National Fund, \$530 million from the public sector, \$1,660 million from private sector funds, and \$24 million from international cooperation.

What is the Tunisian Solar Plan (TSP)?

The Tunisian Government is successfully implementing the Tunisian Solar Plan (TSP), developing renewable energy on a large scale and complying with the agreed climate protection contributions. The project provides policy advice with the support of national and international technical, financial and legal experts.

What is the Tunisian Solar Plan (PST)?

The Tunisian Solar Plan (PST) Tunisia is a signing party to the 2015 Paris

Climate Agreement. The Government has thus committed to Nationally Determined Contribution (NDC) to reduce its greenhouse gas emissions in all sectors, including energy, where a reduction of 46% by 2030 compared to the base year 2010 is targeted.

Government subsidy for mobile solar unit in Tunisia

Financing Solar Energy in Tunisia

La Tunisie, à travers sa stratégie de mix électrique pour l'horizon 2030, s'est fixé un objectif de 30% pour la production électrique à partir de sources renouvelables.
