Government subsidy for modular solar power container in China

Overview

How will China's solar subsidies affect the solar industry?

The reduction in subsidies could place additional strain on China's solar industry, which is already grappling with overcapacity and plummeting panel prices that threaten the viability of smaller manufacturers.

When will China stop subsidizing solar projects?

Effective August 1, 2021, China will stop subsidizing new solar farm projects, distributed solar projects for commercial users, and onshore wind farms. For years, China had been generous towards wind and solar projects.

Why is China's solar industry struggling with overcapacity?

China's solar industry is already facing problems of overcapacity, with plummeting panel prices due to oversupply in global markets. The reduction of subsidies could increase the financial strain of small manufacturers and promoters who depended on government incentives to remain competitive.
