

## European Solar Energy Storage

# Government subsidy for portable pv system in Romania

## Overview

---

Through the European Union's Modernisation Fund, local authorities have just obtained grants under a program for renewables with energy storage, for self-consumption. The Ministry of Energy said the package for public entities for PV facilities is worth EUR 63.6 million.

Through the European Union's Modernisation Fund, local authorities have just obtained grants under a program for renewables with energy storage, for self-consumption. The Ministry of Energy said the package for public entities for PV facilities is worth EUR 63.6 million.

A total of 60,000 households in Romania will be able to benefit from funds for installing photovoltaic panels and batteries, as well as funds for increasing the energy efficiency of homes, the minister of investments and European projects, Adrian Căciu, recently announced. The funds were made.

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities – wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to.

Romanian Minister of Energy Sebastian Burduja signed 113 grant contracts for photovoltaic systems for self-consumption, mostly with local authorities. The package for 41.7 MW in total is worth EUR 63.6 million. Prosumers and their solar power installations are one of the main pillars of the energy.

In 2022, Romanian Ministry of Energy launched a state aid scheme supporting of investments in building manufacturing capacity for production, assembly and recycling of batteries, photovoltaic cells and panels with a total allocation of EUR 260 million. The scheme also supports investments in.

The Ministry of Energy of Romania will provide just over €103 million in financial support for battery energy storage system (BESS) deployments in the country. Minister of Energy Virgil Popescu signed an order approving the state aid scheme for investments in battery energy storage systems on.

European Commission approved on Wednesday, under EU state aid rules, a Romanian scheme of 259 million euros, made available partly through the Recovery and Resilience Facility (“FRR”), to support investments in production, assembly and the recycling of batteries, cells and photovoltaic panels.
