

## European Solar Energy Storage

# Government subsidy for portable pv system in Tunisia

## Overview

---

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Eligible households will benefit from a 1,500 TND (approx. 470 EUR) investment subsidy as well as a subsidised loan with only 3% interest. This loan is automatically repaid through the monthly electricity bill.

Both agreements mark crucial milestones for the Tunisian renewable energy strategy, as PROSOL ELEC Economique will finance residential photovoltaic (PV) systems for 65,000 middle-income households in the whole country. The energy transition on the roofs of the Tunisian middle class is thus.

The Tunisian authorities have provided \$121 million for solar thermal and PV systems. The subsidies can cover up to 30% of initial investments in residential PV installations. The Tunisian government said that it has renewed the financing mechanism for its two national residential solar programs.

To address these challenges, Tunisia has set ambitious targets : Reducing carbon intensity by 45% by 2030 and increasing renewable energy's (RE) share to 35% of electricity production. From 2013 to 2015, major reforms have strengthened the regulatory framework, with the creation of the Energy.

The Tunisian government has renewed the financing mechanism for its two national residential solar programs. Société Tunisienne d'Electricité et de Gaz (STEG) has secured a TND 370 million (\$121.1 million) financing agreement from Zitouna Bank for the Prosol Residential and Prosol Elec programs.

A boost for residential solar adoption in Tunisia?

Banque Zitouna is launching a TND 370 mn (USD 121.1 mn) incentive scheme to offer Tunisian households rebates (a partial refund) on solar systems, according to a statement. Under the financial agreement, Zitouna will also offer loans on the.

Furthermore, solar energy helps Tunisia to find a better way of managing the debt issues of the public sector because of the weight of energy, which is also submitted to the fluctuations in international energy markets. Since the 1990s, the National Agency for Energy Conservation has set up.
