# Government subsidy for power container in Finland

## Overview

---

On 28 June 2024, the Finnish government published key details of a planned tax subsidy for large industrial investments. The initiative seeks to accelerate investments in the green transition, with the government bill expected to be presented to the Parliament in October.

On 28 June 2024, the Finnish government published key details of a planned tax subsidy for large industrial investments. The initiative seeks to accelerate investments in the green transition, with the government bill expected to be presented to the Parliament in October.

The aim of the subsidy scheme is to promote energy investment and energy infrastructure projects that are in line with the Sustainable Growth Programme for Finland and that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target. The scheme also aims to.

On 24 June, the Ministerial Committee on Economic Policy decided that the Ministry of Finance would continue preparing a tax subsidy for large industrial investments that promote the clean transition. This tax subsidy would accelerate investments in the green transition. In its spring 2024 session.

The Finnish government has issued a statement indicating that on Monday, 13 January 2025, a government decree will come into effect regarding state aid for promoting the decarbonization of industrial production processes, enhancing energy efficiency, and facilitating the transition to a.

The Finnish Government has finally introduced its new proposal (HE 207/2024) aimed at fostering large-scale industrial investments that support the transition to a climate-neutral economy. This initiative, which is part of the Government's broader economic growth package, seeks to attract.

Energy aid may be granted to projects that promote new technology, its commercial utilization, and the regulation capacity of the power system, as well as energy savings through energy efficiency. Energy aid may be granted for investment and energy audit projects of companies and organizations that.

On 16 December 2021, the Government issued a decree that will allow support to energy investments under Finland's Recovery and Resilience Plan in 2022–2026. The aim is to promote energy investment and energy infrastructure projects that reduce greenhouse gas emissions in Finland and support the. Where can I find information about energy investment subsidies in Finland?

Website of Business Finland: First application round for energy investment subsidies On 4 October 2022, the Ministry of Economic Affairs and Employment made the first energy investment aid decisions under Finland's Recovery and Resilience Plan to promote clean energy solutions. Aid was granted to six projects totalling EUR 99.8 million.

How does the Sustainable Growth Programme work in Finland?

The Ministry of Economic Affairs and Employment and Business Finland will announce the first call for applications in the next few days. The Sustainable Growth Programme has specified the following amounts of funding to energy investments: The funding will come from the EU Recovery and Resilience Facility (RRF).

How many green transition projects are underway in Finland?

Many of these topics have been further addressed in the proposal. As relevant background, approximately EUR 280 billion worth of green transition investment projects are currently underway in Finland according to the Data Dashboard maintained by the Confederation of Finnish Industries.

Which projects should be prioritized in the energy subsidy program?

In this case, priority is given to well-prepared projects that can cost-effectively promote the goals of the energy subsidy program and that are not estimated to have significant harmful environmental effects.

How much funding is available for the Sustainable Growth Programme?

Upon the adoption of the decree, calls for applications related to the energy system transformation and industrial energy solutions of the Sustainable Growth Programme can be opened. The amount of available funding will total about EUR 520 million.
