

## European Solar Energy Storage

# Government subsidy for pv storage container in Poland

## Overview

---

The Polish government will raise subsidy levels for rooftop PV and storage systems from December under its Mój Prąd scheme. The rebate for solar will increase from PLN 4,000 (\$888) to PLN 6,000 and will more than double from PLN 7,500 to PLN 16,000 for storage.

The Polish government will raise subsidy levels for rooftop PV and storage systems from December under its Mój Prąd scheme. The rebate for solar will increase from PLN 4,000 (\$888) to PLN 6,000 and will more than double from PLN 7,500 to PLN 16,000 for storage.

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance. The National Fund for Environmental.

The Polish government will raise subsidy levels for rooftop PV and storage systems from December under its Mój Prąd scheme. The rebate for solar will increase from PLN 4,000 (\$888) to PLN 6,000 and will more than double from PLN 7,500 to PLN 16,000 for storage. Poland 's government has revealed.

The application for the sixth phase of Poland's "Mój Prąd" (My Electricity) rebate program began earlier this month, offering a total subsidy of PLN 400 million (approximately CNY 738 million) for residential photovoltaic (PV), battery storage, and hot water storage systems. Applies to net-metering.

Poland's Ministry of Climate and Environment has announced the launch of the sixth edition of the "My Electricity" (Mój Prąd) program. This initiative, set to begin on September 2, 2024, and run until December 20, 2024, or until funds are depleted, aims to further support the adoption of renewable.

In early 2024, Polish Secretary of State Urszula Zielińska announced that the government is considering setting a date for the final phase-out of coal, as coal-based power generation is economically unfeasible and threatens energy security. Therefore, a total subsidy of up to 400 million PLN is.

The Polish government will increase the subsidy level for rooftop photovoltaic and energy storage systems under its Mój Prąd program from December, solar rebates will increase from PLN 4,000 (\$888) to PLN 6,000, and tax rebates for energy storage will at least double. From PLN 7,500 to PLN 16,000. Will Poland increase subsidy levels for PV & storage installations?

Poland 's government has revealed that it will increase subsidy levels for residential PV and storage installations under the Mój Prąd (My Electricity) rebate scheme. As of Dec. 15, the subsidy for solar will be raised from PLN 4,000 to PLN 6,000.

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

How much PLN can a storage facility get subsidized?

The program provides subsidies of up to PLN 17,000 for electricity storage

facilities. The minimum storage capacity eligible for support is 2 kWh, with a maximum subsidy of PLN 6,000 per kWh. Such support provides a strong incentive to invest in these technologies.
